

# Alwoodley Parish Council Biodiversity Policy

Alwoodley Parish Council adopts this policy in response to the strengthened 'biodiversity duty' placed on local authorities introduced by the Environment Act 2021. Alwoodley Parish Council will take biodiversity into account in all its decisions and actions.

## Background

All local authorities including parish sector councils must complete their first consideration of what action to take for biodiversity by 1 January 2024. Policies and objectives must be agreed as soon as possible after this. Councils can and should reconsider their actions on a regular basis and must reconsider the actions they can take within five years of when they completed their previous consideration.

According to the Act, public authorities need to check if a number of strategies affect how they comply with their biodiversity duty including:

- Local nature recovery strategies
- Species conservation strategies
- Protected site strategies.

They need to understand how or if they are relevant to their organisation, be aware of how these strategies affect land that is owned and managed by them, or actions they could take to conserve or enhance biodiversity and consider how they can contribute to the strategy where appropriate.

Biodiversity is the collective term for the variety and abundance of forms of life found in an area, including animals, plants, fungi and microorganisms. Each of these species and organisms work together in ecosystems to maintain, balance and support life. Biodiversity supports everything in nature that we need to survive including, food, oxygen, clean air and clean water.

## Commitment

Alwoodley Parish Council will:

1. Consider the impact on biodiversity in the decisions it makes in council, committee, and working group meetings. It will seek to minimise adverse impacts on biodiversity as a result of the council's activities and will identify opportunities to increase biodiversity when practicable.
2. Encourage practices and projects beneficial to biodiversity such as through grants it makes to local groups.
3. Communicate information and raise awareness of biodiversity through its website, newsletters and as part of its leadership role within the local community.
4. The Council will work in partnership with other organisations to protect, promote and enhance biodiversity within areas of the parish.
5. The Council, when commenting on planning applications, will support site and building design that benefits biodiversity through the conservation and integration of existing habitats or provision of new habitats. It will support protection of sensitive habitats from development and will consider whether the development would mean the loss of important habitats for wildlife in respect of all applications.
6. Monitor its internal policies and processes to enhance biodiversity.

Alwoodley Parish Council acknowledges that there is no legislative requirement to produce biodiversity reports. However, where it may further the aims above, reports may be commissioned.

Adopted:12/05/2025
